Edward Kidess

THE BEGINNIG

It was 1973 and I was starting high school and I was 15 and I was half asleep and I was living in Manhattan NYC and saw the beautiful sunrise and seeing the twin towers and then in science class I always wanted to learn it and mix stuff and learn about chemicals and other things and so there is this girl that I like called Emily and in science class I spilled water with yellow food dye in it and it looked like I peed myself and then I ran and everyone laughed at me and then in the middle of the hallway my pants fell and everyone laughed at me and 3 years later I was 18 and became an army mechanic and I learned how to weld I was bad at first but became better at it and started fixing tanks and army trucks and other things and in 1991 I retired and bought a land in Grand by Colorado and bought a small land in and opened a muffler shop there and then in 2002 the new grandboy mayor wanted to open a new concrete plant there and block the way of my muffler shop I tried to stop them in court but failed and they laughed at me making me like a fool and in 2003 I went to California at an auction I bought a new 1969 Komatsu D355A bulldozer and bought 19000 pounds of steel and 19000 pounds of concrete and made a shield for my bulldozer and added 7 cameras and 7 inches of epoxy for protection on the cameras and 4x47 rifles and spent 18 months building it to make a beast called the killdozer and on June 4 2004 I destroyed my muffler shop and went through the city and destroyed the concrete plant the police station and 11 more buildings and more plowings police cars and destroying a hardware store were one off the tracks got stuck and my bulldozer engine failed and I welded myself into the dozer so with no choice I shot myself and the dozer was strapped on a lowboy trailer and was shipped into a scrapyard where it was cut up and scrapped in to pieces so no one can restart it or try to buy it .
