How to find complement of 100

Study sheet

A complement is the number we need to add to reach 100.

- How to find the missing number.

Step 1:

Count by 1s to reach the next **multiple of 10**.
Multiples of 10: 10, 20, 30, 40, 50, 60, 70, 80, 90, 100.

Step 2:

Count by 10s from that multiple of 10 until you reach **100**.
Add both parts together to find the complement.

Ex : $32 + \underline{\ ?\ } = 100$

$32 + \underline{\ 8\ } = 40$

$40 + 60 = 100$

The answer is : $8 + 60 = 68$
