

Chapter 2 Using Windows

Answer keys

A. 1. False 2. True 3. True 4. False 5. False

B. 1. MBR 2. Booting 3. RESTART 4. CUI

C. 1. Warm Boot 2. Operating System 3. GUI 4. Cold Boot
5. Booting

D. 1. Operating system is a system software that is an interface between the user and the computer.

2. Not included in the exam

3. The two operating system interfaces are CUI and GUI. Let us observe their differences.

CUI	GUI
CUI stands for Character User Interface. In this Interface, operating system provides an environment where the user needs to type a command to perform a particular action.	GUI stands for Graphical User Interface. In this Interface, the operating system provides a graphical environment where the mouse acts as a pointing device. The user can perform an action just by a mouse-click.
Example: Disk Operating System (DOS)	Example: Windows

4. If you switch off the computer without giving a proper shut down command then there are very high chances of losing the data or the System files if they are not properly sent back to OS and it may also damage the Windows operating system.

5. Not included in the exam
